Subj: Rollout expansion problem

Hi, Omar!

I have discussion with Deanne before about your plan to rollout expansion restaurant. After that, I have held a meeting with team member about this plan. I know in paper if we expand the restaurant, it can accommodate more guest to dine in. Then it has an impact on increasing revenue.

After I held meeting with team, we found some risks in this plan. First of all, If we expand the restaurant, it's not certain to bring in additional customers. Second, we need more focusing in kitchen scale up to improve our services that can improve customer satisfaction. And the last, we can more focusing in our planning scope about tablet rollout.

That's all our concern about this plan. May we can get your consederation about this plan.
